

Criteria: Program Considerations

As identified by the Oklahoma City Public Schools (OKCPS) Board of Education's Facilities Master Planning Policy adopted in July 2018 (Policy D-12), evaluation of district facilities shall include a review of:

"...the current and potential offerings available at different schools, including curriculum and co-curriculum enrichments, access to a full slate of curriculum and enrichments, cost to operate a building per student, after school programming, out-of-school learning, alternative school models, and extra-curricular activities such as athletics, physical education, voice, and band."

The above language from Policy D-12 speaks to the need for OKCPS to review the complete list of offerings available to students at each facility. This review is intended to be comprehensive in that it includes all offerings provided and sponsored by OKCPS (such as athletics or AP programs) as well as those offerings available as a result of local student interest and volunteer commitment (such as before / after school clubs).

The overarching goal of this criteria is to identify facilities where students have the most opportunities to find a program or activity that is meaningful to them and will further connect them to their peers, teachers, and school. These data help inform the Long Range Facility Master Plan by indicating how student offerings vary across the District and where investments may be required to better ensure all students have access to a wide range of curriculum, athletic, fine art, after-school and extra-curricular enrichments.

OKCPS contracted with a third-party consultant, ADG, P.C. to gather and analyze all data related to our facilities.

Data Collected

The following data have been collected for each facility:

The following data were provided by administration at each facility:

PK – 12 Enrollment: OKCPS assembled enrollment data for each facility during the 2018-19 school year. These data report the number of students served by the facility during the noted school year. These data are important in that they communicate general enrollment trends at each facility.

Teacher Staffing and Supply Costs (SY 2018-19): OKCPS collected data regarding the total cost of teaching staff and supply costs at each facility. These data are important to the master planning process as they are an indicator of the total cost to operate a building per student, relative to peer facilities.

Teacher Staffing and Supply Costs per Student (SY 2018-19): *Teacher Staffing and Supply Costs per Student* was calculated based on *PK-12 Enrollment (SY 2018-19)* and *Teacher Staffing and Supply Costs (SY 2018-19)*. These data are important to the master planning process as they indicate which facilities may be delivering academic instructions more efficiently as well as those that may be less efficient as a result of a smaller student body.

Number of Curriculum Related Offerings (SY 2018-19): OKCPS collected data on the number and type of curriculum related offerings at each facility for SY 2018-19. These data include mentoring programs, tutoring programs, Career / Technical Education programs, and other similar initiatives.

Number of Athletic Offerings (SY 2018-19): OKCPS collected data on the number and type of athletic offerings at each facility for SY 2018-19. These data include all OKCPS and Police Athletic League sponsored athletic activities.

Number of Fine Arts Offerings (SY 2018-19): OKCPS collected data on the number and type of fine arts offerings at each facility for SY 2018-19. These data include offerings such as art, music, band, drama, dance, and voice.

Number of After-School / Extra-Curricular Offerings (SY 2018-19): OKCPS collected data on the number and type of extra-curricular offerings at each facility for SY 2018-19. These data were provided by administration at each facility and included various before and after school programs and clubs. In general, extra-curricular offerings are subject to student interest and volunteer commitment and are not always funded or sponsored by OKCPS.

Total Number of Offerings: In order to determine an overall measure of student offerings at each facility, the number of OKCPS-sponsored offerings, after-school/extra-curricular offerings, & advanced placement coursework were added together.

Advanced Placement Enrollment: OKCPS assembled enrollment data for all AP courses at each high school for SY 2018-19. These data are important in that they communicate the opportunity for students to participate in AP coursework at each high school.

Long Range Facility Master Plan Guiding Principles

GOALS TO AIM FOR

Larger / More Efficient Facilities: Facilities with larger student populations are generally more efficient in terms of the cost to provide educational instruction to students on a per-student basis. OKCPS should strive to establish facilities which are small

enough to provide attention to instruction and administrative detail, but large enough to capitalize on economies of scale.

More Program Offerings: OKCPS facilities should be structured to provide students the greatest access to OKCPS-sponsored offerings, after-school/ extra-curricular activities & advanced placement coursework, that are supported by the local student body and volunteers. Facilities designed to support a variety of offerings and larger enrollment numbers are more likely to provide greater student opportunities. Larger student bodies provide a better opportunity for extra-curricular activities which would otherwise never reach a critical mass.

THINGS TO AVOID

Smaller / Less Efficient Facilities: Smaller facilities are generally somewhat more expensive to operate on a per-student basis. OKCPS should strive to establish facilities which are appropriately sized and allow for the delivery of educational instruction as efficiently as possible.

Fewer Program Offerings: OKCPS facilities with fewer program offerings should be further evaluated. Barriers may include facility limitations, fewer staff resources, smaller student bodies, or lack of volunteer/community support. If possible, these barriers should be taken into consideration as it relates to the Long Range Facilities Master Plan.
